

Food and beverage packaging industry to enhance process efficiency through Sysgration Universal Panel Computer

The front IP65 protection, the multi-touch screen offers optimized visibility and easy-to-use. The Universal Panel Computer enables users to track production status while storing and monitoring material inventory in real-time. This significantly increasing the overall operating performance of the factory.

The Universal Panel Computer also offers data collection with expansion modules such as Barcode reader, RFID, Camera for streamlining efficiencies in factory operations.

Features

- Dual architecture support (x86 & ARM)
- Projected capacitive multi-touchscreen supporting glove/wet modes
- Flat and bezel-free touch display
- Fan-less design with aluminum alloy enclosure
- Front IP65 water & dust-proof
- Flexible panel and wall mount to accommodate various scenarios
- Expansion modules for various applications
- Optional I/O and networking modules

Product Offerings

Intel Apollo Lake

Intel Whiskey Lake

NXP i.MX8M
